Winter wheat production in Wisconsin is forecast at 16.3 million bushels, slightly above last year according to the latest USDA, National Agricultural Statistics Service – *Crop Production* report. Based on conditions as of June 1, farmers anticipate winter wheat to yield 71 bushels per acre, an increase of 6 bushels per acre from last year. If realized, this will mark Wisconsin's third highest winter wheat yield on record. Wisconsin winter wheat growers intend to harvest 230,000 acres for grain, down 8 percent from 2014.

* June Forecast

Wisconsin's winter wheat crop was 23 percent headed or beyond as of May 31, 4 days ahead of 2014

The forecast in this report is based on June 1 conditions and does not reflect weather effects since that time. The next crop production forecast, based on conditions as of July 1, will be released on July 10.
